

COLLABORA

Running Android on the Mainline Graphics Stack

Robert Foss

Software Engineer

robert.foss@collabora.com

Open First

Agenda

- Android Graphics Stack
- Open Source Graphics Stack
- Current Status
- Why does this matter?

Android Graphics Stack

Android Graphics Stack

What does the HWC2 API do?

COLLABORA

Android Graphics Stack

What does the HWC2 API do?

- API used between SurfaceFlinger and hardware

COLLABORA

Android Graphics Stack

What does the HWC2 API do?

- API used between SurfaceFlinger and hardware
- Compose layers to the screen

Android Graphics Stack

What does the HWC2 API do?

- API used between SurfaceFlinger and hardware
- Compose layers to the screen
- Abstract graphical objects

COLLABORA

Android Graphics Stack

What does the HWC2 API do?

- API used between SurfaceFlinger and hardware
- Compose layers to the screen
- Abstract graphical objects
- Offload work from GPU to compositor hardware

Mainline Graphics Stack

What does `drm_hwcomposer` do?

Current Status

Current status

Why now?

Current status

Why now?

- Kernel Buffer Synchronization support
 - Inspired by Android kernels, now in mainline
 - Some GPU drivers now support this

Current status

Why now?

- Kernel Buffer Synchronization support
 - Inspired by Android kernels, now in mainline
 - Some GPU drivers now support this
- Atomic Display Framework API
 - Most drivers implement this

Current status

Tested platforms

COLLABORA

Current status

Tested platforms

- iMX6
 - GPU: Vivante GC3000

COLLABORA

Current status

Tested platforms

- Dragonboard 410c
 - GPU: Adreno 306

COLLABORA

Current status

Under Development

- Dragonboard 820c
 - GPU: Adreno 560

COLLABORA

Current status

Under Development

- HiKey 960
 - GPU: Mali G71

Current status

Project Hosting

COLLABORA

Current status

Project Hosting

- Previously hosted within ChromiumOS

COLLABORA

Current status

Project Hosting

- Previously hosted within ChromiumOS
- Now hosted on [Freedesktop.org](https://freedesktop.org)

Why?

Why?

Long term support

Why?

Long term support

- Deliver products with >10 year lifespan

COLLABORA

Why?

Long term support

- Deliver products with >10 year lifespan
- Support can be provided by anyone

COLLABORA

Why?

Long term support

- Deliver products with >10 year lifespan
- Support can be provided by anyone
- Hardware support even if the vendor disappears

Why?

Push industry towards Open Source

COLLABORA

Why?

Push industry towards Open Source

- Lower driver development costs

COLLABORA

Why?

Push industry towards Open Source

- Lower driver development costs
- Increase driver quality

COLLABORA

Why?

Push industry towards Open Source

- Lower driver development costs
- Increase driver quality
- Lower cost for device manufacturers

Thank you!
