The Big Picture

COLLABORA

The Big Picture

Development

The Big Picture

Development

- Some drivers are very mature

The Big Picture

Development

- Some drivers are very mature
- Non-supported drivers use more common code

COLLABORA

The Big Picture

Development

- Some drivers are very mature
- Non-supported drivers use more common code
- Reverse engineering to driver takes 0-3 years

COLLABORA

The Big Picture

Development

- Some drivers are very mature
- Non-supported drivers use more common code
- Reverse engineering to driver takes 0-3 years
- Vendors support APIs outside usual codebases

The Big Picture

Development

- Some drivers are very mature
- Non-supported drivers use more common code
- Reverse engineering to driver takes 0-3 years
- Vendors support APIs outside usual codebases
- OpenCL is hard.

The Big Picture

Vendors

The Big Picture

Vendors

- Some vendor support is really good

The Big Picture

Vendors

- Some vendor support is really good
- Open Source drivers come in different shapes

COLLABORA

The Big Picture

Vendors

- Some vendor support is really good
- Open Source drivers come in different shapes
  - Vendor supported or not

COLLABORA

The Big Picture

Vendors

- Some vendor support is really good
- Open Source drivers come in different shapes
  - Vendor supported or not
  - Small vendor teams or not

COLLABORA

The Big Picture

Vendors

- Some vendor support is really good
- Open Source drivers come in different shapes
  - Vendor supported or not
  - Small vendor teams or not
  - Control motivated vendor or not
